

IVDC

*The IVDC program helps to keep your inventory prices accurate. When an item goes up in price in the Christian Books and More database, the IVDC program allows BSMGR to update your store's inventory to the new price. After completing the IVDC, stores can go directly to the IVL program and choose "print the labels," and new price labels will be generated. Many stores have told us that this report alone pays for their BSMGR software! **Note:** BSMGR never lowers prices! We leave that decision up to the store.*
